Frontend engineer with more than 4 years of experience developing, maintaining, and designing web and mobile applications. Passionate in creating intuitive, visually appealing solutions. Aspiring entrepreneur and an ambitious woman in tech. Adaptable to changes in new environments and technologies. Seeking a role that supports growth, product impact, and collaboration.

Core Skills

Typescript, Javascript, Vue JS, React, React Native, Next JS, Nuxt JS, Flutter, Dart, HTML, CSS, PHP, Bootstraps, Git, Tailwind

Other Technical Skills

Web & Mobile Application Development, Flutter Web, UI/UX Design, Figma, Jira, Looker, Expo, Scrum, Agile Methodologies

EXPERIENCE

Senior Frontend Developer

Jan 2026 - Present

Bateriku.com

- Developed the frontend for a comprehensive workshop management system ensuring a responsive and seamless user experience.
- Collaborated closely with cross-functional teams to translate UI/UX prototypes and product requirements into robust features, integrating REST APIs smoothly.
- Authored clean, maintainable code and comprehensive technical documentation to streamline onboarding and ongoing system development.
- Leveraged AI acceleration tools to optimize development workflows, significantly increasing coding productivity and sprint efficiency under an Agile framework.
- Tech Used: **Typescript, NuxtJS, VueJS, Tailwind CSS, Agile**

Frontend Software Engineer

Nov 2023 - Dec 2025

FSBM Holdings Bhd - FSBM IDesign

- Developed a React-based data-driven location intelligence platform using Looker to analyze district demographics and nearby point of interest for retail site planning.
- Designed and implemented interactive dashboards for data visualization and improved decision-making.
- Collaborated on product ideation, user research, and prototyping to align UI/UX with business goals.
- Explored and prototyped new technologies (OpenSaaS, Wasp) to evaluate feasibility for scalable SaaS applications.
- Tech Used: **Typescript, Javascript, React, Next JS, Tailwind CSS**, Looker, LookML, Agile, UI/UX

Software Developer II

May 2021 - Oct 2023

Adev Ventures Sdn Bhd

- Developed and maintained the vimigo mobile app, focusing on bug fixes, feature enhancements, and timely releases.
- Continuous improvement of core performance management features in the mobile app using Flutter.
- Implemented new features, optimized app performance, and resolved critical bugs based on user feedback.
- Involved in new product ideation and early-stage planning alongside cross-functional teams.
- Shadowed the project manager to understand project scoping, prioritization, and delivery processes, gaining valuable insight into agile workflows and stakeholder communication.
- Supported team growth initiatives by mentoring new hires and contributing to frontend best practices.
- Tech Used: **Flutter, Dart, GetX**, Scrum, Agile, Jira, Flutter Web

Frontend Developer (Industrial Intership)

Feb 2021 - May 2021

Malaya Mamalia Sdn Bhd

- Designed and developed frontend interfaces for the Roomah mobile and web applications.
- Created high-fidelity prototypes using Adobe XD and implemented UI components with Flutter.
- Contributed to improving early product usability through iterative design feedback and testing.
- Tech Used: **Flutter, Dart**, Adobe XD
